EMC & Safety Test Laboratory

Test Report No. **Y5VAR298B**

FOR:

Company Name : Vest tech USA LLC

Equipment Under Test: Case wallet.

November 2015

Total number of pages (including this page): 10

Table of Contents.

1. General Information.

Applicant:	Vest tech USA LLC
Applicant Address:	32320 Polaris Ave-Suite 20-21 Las-Vegas NV 89102, USA
Telephone:	+1-800-720-9821
E-mail:	contact@vesttech.com
The testing was observed by the following applicant's personnel:	Mr. Geva Segal
Dates of testing:	November 2015
Test Laboratory Location:	SaYdos Ltd / ORDOS Technologies, 10 Zarhin St. Ra'anana Israel, P.O.B 2212
E-Mail:	info@ordos.co.il
Web:	www.ordos.co.il
Equipment Under Test (EUT):	Case wallet
S/N:	VST115040

2. EUT. Performance Verification

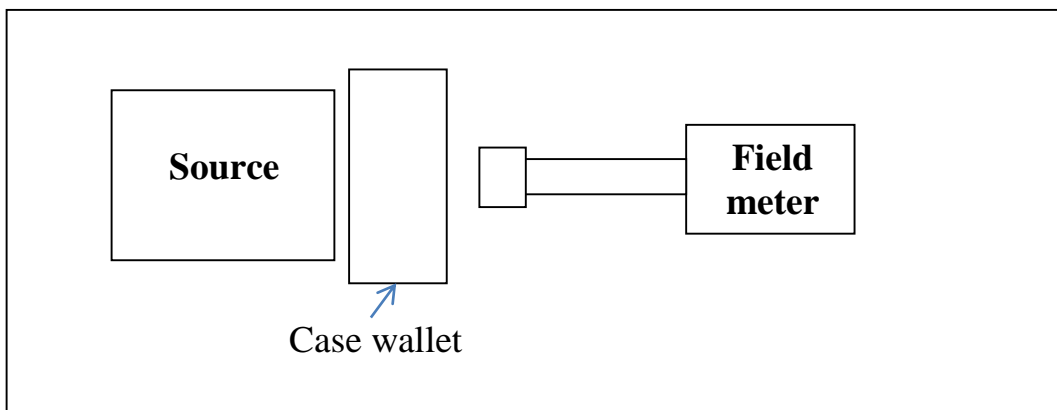

2.1. Product Description.

This product is designed to serve as a smartphone case protecting the user from electromagnetic radiation emitted from the phone – while making a call as well as when carrying it in close proximity to the body.

In addition to its radiation protecting feature, the product also protects the phone from dirt, small bumps and scratches, and serves as a wallet thanks to slots for credit/debit cards and a place for cash in its inner side.

The product is made of high quality PU leather and comes in various models each designed to perfectly fit one of the following models: iPhone 6, iPhone 6 plus, Galaxy S6, and LG L4.

2.2. Tested Configuration.

2.3. List of Equipment used in the tests

No	Description	Model	S.N.	Manufactured by:
Unit Under Test				
1.	EUT	Case wallet	VST115040	vest tech USA LLC

3. The global proliferation of wireless radiation is accelerating at an alarming speed.

There are growing evidences of health risks from exposure.

Every second of the day, we're constantly bombarded with electromagnetic waves such as those emitted from overhead cables, mobile phones, Laptop ovens, wireless devices, computers exc. The list is endless.

Hardly a month goes by these days without a new study revealing that smart phones are either A) ruining your life, or B) not. The scientific debate is heated, and far from resolved, but one thing is clear: by surrounding yourself with wireless devices with no protection, you November actually be playing Russian roulette with your life.

Every year 10,000 new cases of Glioma are diagnosed in the USA and heavy cell phone users show a 40% increased risk of developing that tumor.

Children are much more susceptible to EMF radiation Research shows that radiation penetrates more deeply into a child's head due to their thinner skulls. In fact, it was found that a child's growing body November absorb up to 10 times the radiation an adult's body absorbs.

Pregnant women are at greater risk - exposure to electromagnetic fields in uterus is correlated with health problems such as ADHD, emotional problems, asthma, obesity and possibly Autism Spectrum Disorders.

So as males who are interested in having kids sometime - Research has shown that cell phone radiation-exposed human sperm die three times faster, swim significantly more poorly, become more deformed, and develop significantly more damage to their DNA.

Countries around the world, as well as the European Parliament, are starting to set stricter EMF safety limits and advising limits and advise limiting radiation exposure for children, pregnant women, the elderly and people with compromised immune systems.

4. Case wallet Radiation attenuation test procedure

The procedure was determined in accordance with client request

4.1. Home environment frequencies:

- 4.1.1. Establishing test frequencies, in accordance with the Case wallet purpose.
- 4.1.2. Measure Electro-magnetic field strength in each test frequency.
- 4.1.3. Placing the Case wallet on its intended place.
- 4.1.4. Measure Electro-magnetic field strength in each test frequency.

5. Test procedure pictures

5.1. Pic #1 – test 4.1 without the Case wallet

5.2. Pic #2 – test 4.1 with The Case wallet

6. Description of the Test Site.

Location:		10 Zarchin St. Ra'anana
Phone:		(972)-9-7711018
Fax:		(972)-9-7711019
E-Mail:		info@ordos.co.il
Open Site Ranges:		3 and 10 meter
Turntable:		2.1 x 1.6 meter with maximum loading 1500kg, distant actuation. The turntable and the tested equipment are environmentally protected.
Antenna Mast:		1 to 4 meter
Supply Voltages:		220VAC, 3 Phases, 16A from each phase; 110VAC, 3 Phases, 32A from each phase; up to 50VDC, 30A max
Shielded room:		6.2 X 4.5 X 2.5m semi-anechoic shielded room, including indoor turntable.

7. List of Equipment used in Test.

No.	Description	Manufacturer and Model Number	Series No.	Cal. Date
1.	Electro-magnetic Field meter	Chauvin-Arnoux C.A 43	US4111027	31.08.16

8. Test results.

	Frequency			
	900 MHz	1.8 GHz	2.4 GHz	3.6 GHz
No Cover	124 V/M	183 V/M	109 V/M	88 V/M
With the Case wallet	4.9 V/M	4.5 V/M	4 V/M	3.3 V/M
Attenuation	96%	97%	96%	96%

	Frequency			
	4 GHz	4.9 GHz	5 GHz	5.9 GHz
No Cover	68 V/M	72 V/M	72.4 V/M	71.4 V/M
With the Case wallet	0.9 V/M	0.3 V/M	0.5 V/M	0.1 V/M
Attenuation	98%	100%	99%	100%

9. Conclusion.

- 9.1.** The electro-magnetic field strength attenuation of the Case wallet is up to 100%.
- 9.2.** The Attenuation level for every frequency tested is at least 96%.
- 9.3.** The Standard radiation limit for home and work environment is 3-5 V/M, The Case wallet attenuation is always lower than the limit.
